Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Jan 5, 2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3682

3. Claims 1, 2, 4, 6, and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Sturmer et al., U.S. Patent 6,513,405 B1.

Sturmer et al. shows, in Figs. 1-3, a twistshifter for a bicycle, the twistshifter comprising;
a housing element (1 or 1a) mounted about and nonrotatably fixed to the handlebar;
an actuating element (3 and 12) or (3a and 12a), rotatable about an axis of the handlebar,
the actuating element having a limited angle of rotation;

a locking device (11 or 11a) and (10 or 10a) including a first latching element (10 or 10a) arranged on the housing element and a second latching element (11 or 11a) having a complementary shape for engagement with the first latching element and arranged directly on the actuating element, one of the first and second latching elements having a hook contour extending along a segment of a circumference of the twistshifter near the handlebar and the other of the first and second latching elements forming a cutout having a complementary shape to the hook contour and extending through one of the housing element and the actuating element, wherein disengagement of the first and second latching elements permits disengagement of the actuating element from the housing element;

wherein the first and second latching elements are arranged at a radius of the twistshifter located near the handlebar;

wherein the first and second latching elements (10a and 11a) extend along two segments of a circumference of the twistshifter, the segments defining angles of different sizes;

wherein the hook latching element is arranged on the actuating element;

a chamfer extending along a segment of the circumference of the twistshifter having an angle corresponding to an angle of the segment of the hook latching element.

Art Unit: 3682

Allowable Subject Matter

4. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 2, and 4-7 have been considered but are moot in view of the new ground(s) of rejection.
